

## Our services

### Initial consultation

The first step with each project is an initial face to face consultation. We will listen to your needs and inform you of the eco-friendly processes and choices available to you.

### Graphic Design

We will then produce some draft designs for you to view. Once you are happy with the design, we will layout and typeset the publication before your final sign-off.

### Printing

Once the publications have been signed off, we will oversee your job at the printers and make sure that your publications are printed to the correct specifications and highest standards.

### Web-sites

We can also design and host your website. We are experts at producing user-friendly, eye-catching and successful websites. Your site would be hosted on eco-friendly servers.

# Publishing with a difference

**Green Publishing is a publishing company with a difference. We specialise in designing, producing and printing high quality printed communications, publications and web sites using the most sustainable processes available.**

Publishing  
doesn't have  
to cost  
the earth.

Call us on 1300 720 705 or view our website at [www.greenpublishing.com.au](http://www.greenpublishing.com.au)

## Eco-friendly

### Sustainable design

We make sure that your publication is designed in a sustainable way. Can it be used for more than one purpose? Can we design it to prolong its shelf life to negate the need for more copies?

### Paper selection

We realise that the vast choices available when it comes to using eco-friendly paper can be overwhelming and as part of our service will guide you through this process.

### Choosing a printer

We only use printers that are Forest Stewardship Council (FSC) accredited, we also make sure that our printers have all of the necessary sustainable processes in place.

### Cost myth

Sustainable printing used to cost more, but that is no longer the case. We can produce eye-catching, professional and sustainable publications within your budget.

doesn't have  
the earth

**Green Publishing** design, produce  
and print **high quality** printed  
communications, publications and web  
sites using the most **sustainable** and  
**eco-friendly** methods available.
